Warnings and Safety

IMPORTANT SAFETY INFORMATION The occurrence called “kickback” can cause serious or fatal injury. Always read the instruction manual carefully before using your saw. STIHL uses a green and yellow color-coding system to help you select a powerhead, bar and chain combination that complies with the kickback requirements of ANSI Standard B175.1 (gasoline-powered saws) and §30 of UL 1662/ ANSI Standard B175.1 (electric chainsaws). Ask your STIHL dealer about safe operating procedures and the advantages of **Price \$409.99** STIHL Quickstop® chain brake, STIHL Quickstop® Plus additional chain braking feature, STIHL reduced kickback bars and STIHL low-kickback saw chains. STIHL recommends the use of green reduced kickback bars and green low kickback chains on all STIHL chainsaws.

Note: STIHL recommends use of fuel with no more than 10% Ethanol content. Using fuel with greater than 10% Ethanol content may cause damage to your equipment and may void your STIHL warranty.

Product Description

Stihl Gas 18” Homeowner Chainsaw - MS 212 C-BE

The feature-packed MS 212 C-BE offers you optimal comfort and powerful performance. STIHL Quickstop® reduces the risk of injury due to kickback, the Easy2Start™ system makes starting the tool almost effortless, and the STIHL anti-vibration system provides comfort during frequent use. This chainsaw also comes loaded with an 18-inch Light 04 guide bar for durable, lightweight cutting and a Master Control Lever™, so you can easily operate the choke, starting throttle lock, and on-off switch. The sleek, updated design gives it a professional feel, and the diagnostic socket allows you to easily track information about operating times, diagnostic support, and more. The MS 212 C-BE offers the right balance of power and accessibility to make it ideal for frequent use around the home.

Features

Top of the 1148 Series -Packed with features to maximize operator comfort and take on tough tasks, it is the top entry-level gas-powered chainsaw in the 1148 series.

STIHL Easy2Start™ (E) -The STIHL Easy2Start™ system makes starting STIHL outdoor power tools almost effortless, eliminating the need for a strong pull of the starting cord. This advanced starting system is designed to make starting STIHL products easier. The specific system may vary by model, but in each case, a quick pull overcomes the engine’s compression to minimize the strength and effort required to start. Available on selected products.

STIHL Quickstop® -STIHL chainsaws are equipped with a chain stopping system designed to reduce the risk of injury in certain kickback situations. It is called a STIHL Quickstop® chain brake. The STIHL Quickstop® chain brake is designed to stop the rotation of the chain if activated by the operator’s hand or by inertia if the saw kicks back with sufficient force. In some working positions, the STIHL Quickstop® chain brake can be activated by inertia, stopping the chain within fractions of a second.

IntelliCarb™ Compensating Carburetor -The IntelliCarb™ Compensating Carburetor is designed to automatically adjust the air/fuel ratio when the air filter becomes restricted or partially clogged and maintains the engine’s correct RPM. IntelliCarb™ uses air from the clean side of the air filter to control the diaphragm and flow of fuel. As the air filter becomes dirty and less air is available for the carburetor, the IntelliCarb™ system adjusts the fuel flow to compensate for the decrease in air flow. This is in contrast to typical carburetors that utilize this air from the “dirty” side of the air box.

Quick Chain Adjuster (QCA) (B) -The Quick Chain Adjuster (QCA) (B) allows the user to adjust the tension of the chain without the use of tools. This allows for easy chain adjustment.

STIHL OILOMATIC® Saw Chain -The chain features specially engineered grooves designed to channel oil to critical wear areas.

Diagnostic Socket -The convenient diagnostic socket makes it easy for a local STIHL Dealer to plug in the chainsaw and access information about operating time, diagnostic support, and more.

Front Hand Guard -The hand guard is designed to reduce the risk of injury.

Rear Hand Guard -The hand guard is designed to reduce the risk of injury and provide a wide area for foot placement during starting.
