

using your saw. STIHL uses a green and yellow color-coding system to help you select a powerhead, bar and chain combination that complies with the kickback requirements of ANSI Standard B175.1 (gasoline-powered saws) and §30 of UL 1662/ ANSI Standard B175.1 (electric chainsaws). Ask your STIHL dealer about safe operating procedures and the advantages of the STIHL Quickstop® chain brake, STIHL Quickstop® Plus additional chain braking feature, STIHL reduced kickback bars and STIHL low-kickback saw chains.

STIHL recommends the use of green reduced kickback bars and green low-kickback chains on all STIHL chainsaws.

WARNING! Improper use of any power tool may cause serious or fatal injury. Product Description

Features

Electronic Operating System -Located by the handle of the saw, the electronic operating system allows the operator to easily see how the saw is running

Low Oil Sensor -The low oil sensor allows the operator to see when the oil is low so they can keep the bar and chain properly lubricated.

STIHL Quickstop® -STIHL chainsaws are equipped with a chain stopping system designed to reduce the risk of injury in certain kickback situations. It is called a STIHL Quickstop® chain brake. The STIHL Quickstop® chain brake is designed to stop the rotation of the chain if activated by the operator's hand or by inertia if the saw kicks back with sufficient force. In some working positions, the STIHL Quickstop® chain brake can be activated by inertia, stopping the chain within fractions of a second.

IPX4 Rating -This tool is IPX4-rated for weather-resistant construction and has been designed and tested for splash-water protection.

Ematic™ Lubrication System -The Ematic™ guide bar, when used with STIHL OILOMATIC® saw chain, will provide proper lubrication and less oil consumption than conventional methods. The system works because two ramps, strategically placed in the guide bar rail, help contain the flow of oil and direct all lubrication to the sliding faces of the bar and chain links as well as the rivets and driver holes, which in turn can reduce bar oil consumption up to 50%.

STIHL Electric Motor -Lightweight and compact, STIHL electric motors require minimal maintenance and feature low noise levels and reduced vibration.

Magnesium Motor Housing -The magnesium motor housing provides added durability to this powerful chainsaw.

AGZA Certified -Meets the low-emission standards established by the American Green Zone Alliance.

Captive Bar Nut -The captive bar nut is held securely in place, which eliminates the risk of dropping or losing the bar nut during saw chain maintenance.

Lightweight Portability -This product is lightweight for easy portability, great maneuverability, and extended use.

Warnings and Safety

WARNING FOR CORDED-ELECTRIC USERS! STIHL recommends that leg protection be worn when operating corded electric chainsaws. However, the fibers may not stop the sprocket on most corded electric chainsaws because of the constant high torque.

* The actual listed guide bar length can vary from the effective cutting length based on which powerhead it is installed on.

IMPORTANT SAFETY INFORMATION

The occurrence called "kickback" can cause serious or fatal injury. Always read the instruction manual carefully before
