

**Ergonomic Grip** -The ergonomic top-handle bar design provides an optimal comfortable grip in any working position.

## Warnings and Safety

**WARNING!** Never use carbide-tipped, wood cutting, or circular saw blades on cut-off machines. They can cause severe personal injury or death from reactive forces, blade contact, or thrown tips. Never cut wood of any type. The TSA 300 STIHL Cutquik® is a battery-powered cut-off machine that is designed to be powerful, easy to handle, simple to use, and low maintenance.

**STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.**

## Product Description

### Features

**STIHL Magnetic Filter** -The TSA 300 STIHL Cutquik® brushless motor is protected from the influence of fine metal dust particles because of a magnetic filter, increasing the lifetime of the unit.

**Increased Cutting Depth On a 12" Wheel Cut-Off Machine (TSA 300)** -The TSA 300 STIHL Cutquik® is designed to cut deeper than a 12" TS 410 gas-powered cut-off machine.

**Lightweight Design** -The lightweight design helps reduce operator fatigue.

**Compact Powerhead Design (TSA 300)** -The TSA 300 STIHL Cutquik® compact powerhead design means less user fatigue and greater productivity.

**Electronic Coast Down Brake** -The electronic coast down brake stops the cutting wheel in less than four seconds.

**Water Resistance While Wet-Cutting** -The TSA 300 STIHL Cutquik® is water resistant while wet-cutting.

**Variable-Speed Trigger** -The variable-speed trigger allows precise control for each task.

**Brushless Motor** -The advanced brushless motor virtually eliminates maintenance while supplying the power and performance you expect from STIHL.

**Water Connection and Shut-Off Valve** -The water connection is designed for the user to shut off the water when the unit is not in use and not waste water.

**Quick Connect Hose Adapter** -The quick connect hose adapter is designed not to spray water on the user when the pressurized water hose is disconnected.

**Magnesium Guard** -The cutting wheel guard is made from lightweight and durable magnesium to improve maneuverability.

**STIHL Smart connector 2 A Ready** -With its motor housing molded to accept the Smart connector 2 A, users are able to take advantage of the STIHL connected platform. STIHL connected gives users a new level of tool management from their connected device.

**IPX4 Rating** -This tool is IPX4-rated for weather-resistant construction and has been designed and tested for splash-water protection.

**Multi-Function Control Handle** -Having easy access to all controls on one handle helps make it easier to complete tasks, so the operator's hand never has to leave the handle.

**Semi-Automatic Belt Tensioning** -With consistent semi-automatic re-tensioning, this feature increases the service life of the belts and shaft bearings
