Product Description

Features

Versatile, rugged brushcutter for professional applications and forestry clearing -A high-performing brushcutter, that gives professionals a versatile tool for cutting and thinning growth.

STIHL FS Advanced Handle Grip -The STIHL FS Advanced Handle Grip offers the most ergonomic bike handle in the STIHL lineup with improved grip for better handling and molded rubberized thumb rests to help reduce strain on joints.

Standard with STIHL M-Tronic™ 3.0 -The STIHL M-Tronic™ 3.0 system provides optimum performance for professionals by automatically adjusting for changes in the operating environment.

Universal Gear with Relubrication Option -The universal gear receives more lubrication than the previous model thanks to a system that has been improved through better lubricant circulation and an improved sealing system.

Available with the new 9.84 in. (250 mm) circular saw blade -**Available with AutoCut® 46-2** -

Large deflector design -With its increased size to accommodate a larger cutting swath, the new deflector design helps protect users from debris.

Reduced Vibration Level -Tool is designed to reduce vibration while providing excellent handling.

Powerful Low Exhaust Emission Engine -A powerful low exhaust emission engine saves users fuel and operating costs without losing the power they count on to get the job done.

High-Tech Polymer Housing -Housings are lightweight, withstand greater impact, and are corrosion-resistant.

Fully-Lined Drive Shaft -A lined shaft provides smooth operation and less vibration.

Throttle Trigger Interlock -This safety feature must be depressed before the trigger can be activated.

Air Filter Cover -Easily remove the cover for fast and easy filter cleaning or replacement.

Protected Spark Plug -The spark plug is protected yet easy to change.

Upright Translucent Fuel Tank -Easily check the fuel level before starting work. If fuel is needed, the upright position makes the tank easier to fill.

Warnings and Safety

WARNING! Improper use of any trimmer/brushcutter can cause serious or fatal injury. Read, understand, and follow all safety instructions in your instruction manual. To reduce the risk of injury from blade contact, circular saw blades may be used on FS brushcutters that have a limitstop, a bicycle handle, and double shoulder harness and not on FS brushcutters with a "J" handle or loop handle. Other rigid blades may be used on FS brushcutters having a bicycle handle, a "J" handle, or a loop handle equipped with a barrier bar. To reduce the risk of eye injury always wear proper eye protection. Always use the appropriate deflector for the type of cutting attachment, as explained in your instruction manual.
