Product Description

Features

Master Control Lever™ -The Master Control Lever™ is an easy to use single lever, operating the choke, starting throttle lock, and on-off switch. The operator must pull the throttle trigger before moving the Master Control Lever™ to the choke position.

Simplified Starting Procedure -To get started, users simply pump the fuel primer, set the choke, and pull the starter cord. The built-in stop switch allows the user to turn off the engine with a simple press of the button. When the engine is off, the throttle lock automatically returns to the "start" setting. The tool will be ready to start again when the user is ready to get back to work.

Double-Sided Blades -The dual-ground blade system provides a clean cut and is ideal for cutting through stronger, thicker branches.

Anti-Vibration System -STIHL has a system for minimizing the vibration levels of handheld outdoor power equipment. The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

Compact, Ergonomic Design -The compact, ergonomic design provides more comfortable use.

Multi-Function Control Handle -Having easy access to all of the controls on one comfortable handle helps makes it easier to complete tasks so the operator's hand never has to leave the handle.

Throttle Trigger Lockout -This safety feature must be depressed before the trigger can be activated.

Warnings and Safety

Note: STIHL engine products with the Caring for Nature logo are cleaner than EPA Standards for exhaust emissions.
