Product Description

Features Long-life Air Filtration System -The long-life air filtration system helps reduce the need for frequent filter cleanings. **STIHL QuickStop® Auger Brake** -This braking system is designed to stop the bit from digging when the auger hits a hard underground impediment. In addition, the STIHL QuickStop® drill brake acts to stop backwards rotation. A jammed drill bit can simply be unscrewed from the borehole. **Hip Pad** -The hip pad is positioned close to the body or leg of the operator during use for more comfortable operation. **Vibration-Dampening System** -This advanced vibration-dampening frame increases user comfort and helps reduce operator fatigue, especially when used over long periods of time. The STIHL BT 131 earth auger is a high performance and lightweight tool professionals need for post-hole digging, fence installation, large planting projects, environmental restoration, and construction projects. Featuring a powerful, fuel-efficient engine and a larger fuel tank than previous models, this auger works longer with fewer refuels. It also features a vertical pleated air filter for improved air supply quality and extended service life. Its semi-automatic choke lever enables a simplified starting procedure that reduces the chance of flooding, while the STIHL Quickstop® auger brake is designed to automatically stop the auger bit from turning if it hits a hard underground impediment. With an ergonomic design, the BT 131 delivers control and comfort while reducing fatigue. Don't miss out on this auger that combines power and performance. Note: Augers and bits sold separately **Warnings and Safety WARNING!**Improper use of any power tool may cause serious or fatal injury. Read, understand, and follow carefully the operating and safety instructions in your instruction manual before using such products. **STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.**
