Product Description

Features 72 V Brushless Motor -The BRA 500 is capable of an output of 32 N of blowing force on boost mode for moving wet leaves and debris and four speeds including: ECO mode, mid-level, full performance, and boost mode **Radial fan motor with Noise Reduction System** -The radial fan motor with Noise Reduction System helps keep noise at 64 decibels, allowing users to operate in noise-sensitive areas **Constant Power** -The BRA 500/600 gives users constant powerful performance with no drop-off in power (in standard mode) **Deluxe HMI Control** -The BRA 500/600 comes with a convenient HMI display and control panel right at your fingertips so you can monitor diagnostics like battery life and control various applications such as the cruise control and power level. **Ergonomic, Comfortable Design** -The BRA 500/600 is designed with operator comfort in mind, featuring an anti-vibration system and a three-point harness with optional lap belt for ergonomic use and optimal user comfort. **Power-to-Weight Ratio** -The BRA 500/600 features an exceptional power-to-weight ratio so users can take on heavy-duty work like wet leaves and debris while carrying less than 32lbs on their back **Two Nozzles Included** -Users can customize the blower for different applications with the included volume nozzle for large quantities of dry debris and the air speed nozzle for wet debris. **IPX4 Rating** -This tool is IPX4-rated for weather-resistant construction and has been designed and tested for splash-water protection. **Soft-Grip Handle** -This handle design provides a firm and comfortable grip. **Boost Mode** -Activating the second stage of the throttle delivers maximum air velocity no matter which power level. **Adjustable Harness** -The BRA 600 and BRA 500 are designed with operator comfort in mind, featuring an anti-vibration system and an adjustable support harness for ergonomic use and optimal user comfort. The BRA 500 battery-powered blower, compatible with the AP 500 S battery, features an exceptional power-to-weight ratio for heavy-duty work and optimal operator comfort. The radial fan motor with Noise Reduction System allows users to operate in noise-sensitive areas. The HMI display puts diagnostics and applications like cruise control right at your fingertips. With four speed levels including Boost and ECO modes, this blower offers customized performance and constant power, with no drop-off in power across the life of the battery in standard mode. Comfort features like cruise control and the three-point harness with optional lap belt help optimize operator comfort. Engineered with IPX4-rated weather-resistant construction, this powerhouse is designed and tested for splash-water protection. **Warnings and Safety STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.**
