Product Description

Features

Low-Noise Sound Damper -A noise suppression-muffler in the blower tube on handheld blowers makes this an ideal feature for homeowners or landscapers working in noise-sensitive areas.

Powerful Low Exhaust Emission Engine -A powerful low exhaust emission engine saves users fuel and operating costs without losing the power they count on to get the job done.

Simplified Starting Procedure -Saves the user time and reduces the chance of flooding the engine when starting.

Purge Pump Primer -The purge pump primer feature enables the user to prime the carburetor with fuel, enabling easier starting. The purge pump primer is designed in a way that the operator cannot flood the machine by priming the carburetor too many times. Flooding the engine is still possible if the choke is not removed after the engine fires.

High-Tech Polymer Housings -Housings are lightweight, withstand greater impact, and are corrosion-resistant.

Made in America -A majority of STIHL products sold in America are made in America of U.S. and global materials.

The STIHL BG 66 L features a low exhaust emission engine with a specially designed muffler, making this tool quiet and ideal for use in neighborhoods or other noise-sensitive areas. Starting is easier and smoother than ever with the simplified starting system that incorporates a specialized stop switch that automatically returns to the start position. The semi-automatic choke lever also helps prevent accidental flooding. The BG 66 L utilizes all of these features to provide the power you need to tackle your next outdoor task.

Note: Not available for purchase or delivery in California

Warnings and Safety

WARNING!Improper use of any power tool may cause serious or fatal injury. Read, understand, and follow carefully the operating and safety instructions in your instruction manual before using such products.

STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.
