

comfort. Ideal for professional landscapers, it features a multi-function control handle allowing for effortless access to all controls on one comfortable handle. STIHL Easy2Start™ comes standard and one-touch stop can turn off the engine with the simple press of a button. This blower completely stacks with 20% more power than the BR 700 and can be hung for storage. Its telescopic tube is easily adjustable for various heights without the use of tools. The BR 800 C-E MAGNUM® also features a starting handle on the side of the unit, allowing you to start and restart the engine while continuing to wear the blower.

The BR 800 C-E MAGNUM® is made in America of U.S. and global materials.

Note: Not available for purchase or delivery in California.

Warnings and Safety

Note: STIHL engine products with the Caring for Nature logo are cleaner than EPA Standards for exhaust emissions.

STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.

Product Description

Features

STIHL Easy2Start™ -The STIHL Easy2Start™ system makes starting STIHL outdoor power tools almost effortless, eliminating the need for a strong pull of the starting cord. This advanced starting system is designed to make starting STIHL products fast and easy. The specific system may vary by model, but in each case, a quick pull overcomes the engine's compression to minimize the strength and effort required to start. Available on selected products.

One-touch Stop Button -Users can save time and reduce the chance of flooding thanks to the one-touch stop button, which allows the engine to be shut off with the simple press of a button.

Adjustable Support Harness -STIHL backpack blowers and sprayers are equipped with an adjustable support harness that distributes weight evenly across the shoulders and back, reducing user fatigue.

Powerful Low Exhaust Emission Engine -A powerful low exhaust emission engine saves users fuel and operating costs without losing the power they count on to get the job done.

Throttle Trigger Lock with Built-In Momentary Stop Switch -The built-in stop switch allows the user to turn off the engine with a simple press of the button or lever. When the engine is off, the throttle lock automatically returns to the "start" setting. Your power tool will be ready to be started when you're ready to get back to work.

Multi-Function Control Handle -Having easy access to all of the controls on one comfortable handle makes it easy to complete tasks so the operator's hand never has to leave the handle.

Anti-Vibration System -The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

Purge Pump Primer -The purge pump primer feature enables the user to prime the carburetor with fuel, enabling easier starting. The purge pump primer is designed in a way that the operator cannot flood the machine by priming the carburetor too many times. Flooding the engine is still possible if the choke is not removed after the engine fires.

High-Tech Polymer Housings -Housings are lightweight, withstand greater impact, and are corrosion-resistant.

Made in America -A majority of STIHL products sold in America are made in America of U.S. and global materials.

To tackle large properties and heavy debris, there is nothing like the clean-up power of the BR 800 C-E MAGNUM®. Made in America,⁹ the most powerful backpack blower in the STIHL line offers maximum blowing force as well as optimal
