### Product Description

#### Features

**STIHL ElastoStart™** -The ElastoStart™ starter handle is an exclusive feature of STIHL. It is a starting grip with a built-in shock absorber that helps reduce the effort when pulling on the starter cord. The ElastoStart™ starter grip noticeably reduces the sudden peak forces (compression) normally felt during cranking. The forces which occur at the grip after the first compression stroke are smoothed out.

**Compact, Ergonomic Design** -The compact, ergonomic design provides more comfortable use.

**Throttle Trigger Lock with Built-In Momentary Stop Switch** -The built-in stop switch allows the user to turn off the engine with a simple press of the button or lever. When the engine is off, the throttle lock automatically returns to the “start” setting. Your power tool will be ready to be started when you’re ready to get back to work.

**Powerful Low Exhaust Emission Engine** -A powerful low exhaust emission engine saves users fuel and operating costs without losing the power they count on to get the job done.

**Anti-Vibration System** -The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

**Soft-Grip Handle** -This handle design provides a secure and comfortable grip.

**Simplified Starting Procedure** -Saves the user time and reduces the chance of flooding the engine when starting.

**Purge Pump Primer** -The purge pump primer feature enables the user to prime the carburetor with fuel, enabling easier starting. The purge pump primer is designed in a way that the operator cannot flood the machine by priming the carburetor too many times. Flooding the engine is still possible if the choke is not removed after the engine fires.

**High-Tech Polymer Housings** -Housings are lightweight, withstand greater impact, and are corrosion-resistant.

When the job runs long, the STIHL BR 430 is right there with you. It has the features you need to get the job done with fewer refuels and less fatigue. Its pro-sized 57.5 oz. fuel tank goes even farther thanks to a fuel-efficient engine that produces cleaner exhaust emissions when compared to standard two-stroke engines. In addition to its anti-vibration system and ElastoStart™ handle, the blower also features back padding, broad shoulder straps, and soft rubber grip for enhanced comfort and support.

Note: Not available for purchase or delivery in California

#### Warnings and Safety

**WARNING!** Improper use of any power tool may cause serious or fatal injury. Read, understand, and follow carefully the operating and safety instructions in your instruction manual before using such products.

**STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.**
