Product Description

Features

HD2 Air Filter -The new HD2 air filter on this unit is washable, providing extremely long filter life and lowering maintenance costs. The large surface area allows for longer run times between cleanings and high performance even while operating in dusty and dry conditions. Overall, the HD2 air filter provides better protection of the engine compared to standard air filters.

Throttle Trigger Lock with Built-In Momentary Stop Switch -The built-in stop switch allows the user to turn off the engine with a simple press of the button or lever. When the engine is off, the throttle lock automatically returns to the “start” setting. Your power tool will be ready to be started when you’re ready to get back to work.

Powerful Low Exhaust Emission Engine -A powerful low exhaust emission engine saves users fuel and operating costs without losing the power they count on to get the job done.

Anti-Vibration System -STIHL has a system for minimizing the vibration levels of handheld outdoor power equipment. The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

Soft-Grip Handle -This handle design provides a secure and comfortable grip.

Simplified Starting Procedure -Saves the user time and reduces the chance of flooding the engine when starting.

Purge Pump Primer -The purge pump primer feature enables the user to prime the carburetor with fuel, enabling easier starting. The purge pump primer is designed in a way that the operator cannot flood the machine by priming the carburetor too many times. Flooding the engine is still possible if the choke is not removed after the engine fires.

High-Tech Polymer Housings -Housings are lightweight, withstand greater impact, and are corrosion-resistant.

Made in America -A majority of STIHL products sold in America are made in America of U.S. and global materials.

For the toughest landscaping challenges, professionals turn to the most powerful gas-powered handheld blower in the STIHL lineup, the BG 86. It features a fuel-efficient, low exhaust emission engine and includes both flat and round nozzle attachments for better job versatility. This blower is also very comfortable to use. With a four-spring anti-vibration system, a soft-grip handle, and the STIHL ElastoStart™ shock-absorbing starter, the BG 86 is fully equipped and ready to get to work.

Warnings and Safety

WARNING!Improper use of any power tool may cause serious or fatal injury. Read, understand, and follow carefully the operating and safety instructions in your instruction manual before using such products.

STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.
