### Product Description

#### Features

**One-Touch Adjustment Blower Tube** -The one-touch-adjustment blower tube makes it easy for users to change blower length to suit their height and access hard-to-reach areas.

**Adjustable Support Harness** -STIHL backpack blowers and sprayers are equipped with an adjustable support harness that distributes weight evenly across the shoulders and back, reducing user fatigue.

**Powerful Low Exhaust Emission Engine** -A powerful low exhaust emission engine saves users fuel and operating costs without losing the power they count on to get the job done.

**Throttle Trigger Lock with Built-In Momentary Stop Switch** -The built-in stop switch allows the user to turn off the engine with a simple press of the button or lever. When the engine is off, the throttle lock automatically returns to the “start” setting. Your power tool will be ready to be started when you’re ready to get back to work.

**Multi-Function Control Handle** -Having easy access to all of the controls on one comfortable handle makes it easy to complete tasks so the operator’s hand never has to leave the handle.

**Anti-Vibration System** -The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

**Simplified Starting Procedure** -Saves the user time and reduces the chance of flooding the engine when starting.

**Purge Pump Primer** -The purge pump primer feature enables the user to prime the carburetor with fuel, enabling easier starting. The purge pump primer is designed in a way that the operator cannot flood the machine by priming the carburetor too many times. Flooding the engine is still possible if the choke is not removed after the engine fires.

**High-Tech Polymer Housings** -Housings are lightweight, withstand greater impact, and are corrosion-resistant.

**Made in America** -A majority of STIHL products sold in America are made in America of U.S. and global materials.

An all-in-one backpack blower, the BR 600 combines power, fuel efficiency, and durability. With its simplified starting procedure, four-point anti-vibration system, and three-position adjustable blower tube, the BR 600 sets the standard for professional-grade backpack blowers. It features a low exhaust emission engine, making it a great choice for both urban and rural areas. No matter where the job takes you, the BR 600 backpack blower is the ideal choice for heavy-duty cleanup.

#### Warnings and Safety

**STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.**
