Product Description

Features

Onboard Attachment Storage - With the onboard attachment holder, all of your vacuum's attachments are within easy reach during cleanup jobs. Plus, it keeps all of your accessories organized during storage.

Filter Cleaning System - The built-in automatic filter cleaning system makes maintenance fast and easy. Just lock the suction inlet, turn on the machine and the filter cleans itself.

Floor/Crevice Nozzle - The floor/crevice nozzle attachment enables vacuuming in narrow spaces that are typically unreachable with regular nozzles. The attachment can be stored on the vacuum's onboard attachment holder, making it easily available for use any time you need it.

When you need professional cleaning power at home, plug in the STIHL SE 62 wet/dry vacuum. With 210 mbars of suction, it's powerful enough for a construction site, but designed to fit neatly into your home or workshop. The SE 62 features a 5.2 gallon capacity canister and built-in filter cleaning system. Its pleated filter system is long lasting and traps dust, hair, and other fine particles. The SE 62 is also versatile, featuring three cleanup tools—a universal tool, crevice tool, and floor tool—each stored directly on the vac for quick access. A 16 foot electrical cord and an eight foot suction hose help you cover more area freely, while its high-performance polymer tube provides greater durability over plastic tube alternatives. This is your vac for heavy-duty household cleanups.

Warnings and Safety

WARNING! Improper use of any power tool may cause serious or fatal injury. Read, understand, and follow carefully the operating and safety instructions in your instruction manual before using such products.
