Product Description

Features

Stop Switch -With the Stop Switch, the equipment's ignition is always ready for starting. Products with this feature shut off easily by pressing and holding down the switch. When the switch is released, it returns to the start position automatically, reducing the number of steps needed to start the product.

Made in America -A majority of STIHL products sold in America are made in America of U.S. and global materials.

Skid Plate -All STIHL edgers come equipped with a skid plate to protect the gearbox during use.

The STIHL FC 96 professional edger doesn't just clean up edges in your landscape, it cuts you a new one. Featuring a low exhaust emission engine, it has a larger fuel tank providing 30% longer run times than the previous model. So whether you're touching up existing walkways or creating new lines in dense, compacted soil, this edger helps you achieve a clean, finished appearance. It even features a vertical pleated paper air filter for extended service intervals, one touch stop, and an easy three-step start procedure enabled by the semi-automatic choke lever. When you need a powerful edger, the FC 96 will give you the edge you're looking for.

Note: Not available for purchase or delivery in California

Warnings and Safety

WARNING!Improper use of any power tool may cause serious or fatal injury. Read, understand, and follow carefully the operating and safety instructions in your instruction manual before using such products.

Note: STIHL recommends use of fuel with no more than 10% Ethanol content. Using fuel with greater than 10% Ethanol content may cause damage to your equipment and may void your STIHL warranty.

Note: STIHL engine products with the Caring for Nature logo are cleaner than EPA Standards for exhaust emissions.

STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.
